

Awakening the Dream

Unveiling the Landscape of the Soul

Workshop with Eva Rider, MA, MFT

Dreams are the quickest way into our inner world. They astonish us with their wisdom about past, present and future. – Marion Woodman

A dream that is not understood remains a mere occurrence; understood, it becomes an experience. – CG Jung

Join Dream Facilitator Eva Rider in an exploration of the hidden language of the dream.

As we unveil role of the dream in our daily lives as guide, messenger and mediator between the realms of the unconscious and conscious, we discover meaning, wisdom and deepened access to our creativity.

We will use images from our own dreams in incorporating gesture, movement and music with art and collage to bring the divine messenger into form. We will use the glyph of The Tree of Life as the skeletal structure for entering the dream.

To get the most from this workshop, familiarity with Jung, dream work or movement is helpful.
